

# THE VALUE OF MULTIPOINT INSPECTIONS, BY THE NUMBERS

Profitable growth is every dealer's priority, but as margins compress and sales slow, it isn't easy to achieve. However, top-performing dealers have found a powerful source of untapped revenue to keep business strong: multipoint inspections in the service department.

**So how can multipoint inspections improve revenue — and by how much?**

“With the additional service recommendations in Xtime Inspect, we have sold \$319 more per inspection. It streamlines digital communications and provides robust reporting.”

—Chad Holsinger, Service Manager | Fletcher Jones Volkswagen

Multipoint inspections are a major revenue driver — but only when dealers do them regularly. Now there's an easier way to inspect every vehicle, every time: with Xtime Inspect.

Xtime Inspect is a digital multipoint inspection tool that helps service advisors and technicians identify more opportunities, maximize every repair order, and grow their dealerships profitably.
